CLAIM AMENDMENTS

Claim 1. (Currently Amended) A method of providing through an electronic medium a medical log of a customer on a telematics device included in a vehicle, the method comprising:

presenting, on the telematics device of the vehicle, to the customer through the electronic medium a virtual garage having communication links to a plurality of telematics service providers;

requesting, from the telematics device of the vehicle, the medical log of the customer from the virtual garage;

transmitting the medical log of the customer from the virtual garage to the telematics device of the vehicle, wherein the medical log is obtained from the virtual garage and the plurality of telematics service providers, and wherein the medical log includes non-audible data;

storing the medical log in an on-board database associated with the telematics device of the vehicle; and

retrieving the medical log of the customer from the on-board database during a medical roadside emergency.

Claim 2. (Original) The method of claim 1, wherein the electronic medium comprises the Internet.

Claim 3. (Canceled)

Claim 4. (Original) The method of claim 1, wherein the virtual garage is accessed through a wireless connection.

Claim 5. (Original) The method of claim 1, wherein the virtual garage is a life management and enhancement server.

Claim 6. (Original) The method of claim 1 further comprising transmitting updates from the plurality of telematics service providers to the virtual garage.

7. (Currently Amended) The method of claim 1, wherein the medical log ~~personalized information~~ is transmitted from the virtual garage to the telematics device using an FM subcarrier network.

Claim 8. (Currently Amended) A system for providing through an electronic medium a medical log of a customer on a telematics device included in a vehicle, comprising:

means for presenting, on the telematics device of the vehicle, to the customer through the electronic medium a virtual garage having communication links to a plurality of telematics service providers;

means for requesting from the telematics device of the vehicle, the medical log of the customer from the virtual garage;

means for transmitting the medical log of the customer from the virtual garage to the telematics device of the vehicle, wherein the medical log is obtained from the virtual garage and

the plurality of telematics service providers, and wherein the medical log includes non-audible data;

means for storing the medical log in an on-board database associated with the telematics device of the vehicle; and

means for retrieving the medical log of the customer from the on-board database during a medical roadside emergency.

Claim 9. (Original) The system of claim 8, wherein the electronic medium comprises the Internet.

Claim 10. (Canceled)

Claim 11. (Original) The system of claim 8, wherein the virtual garage is accessed through a wireless connection.

Claim 12. (Original) The system of claim 8, wherein the virtual garage is a life management and enhancement server.

Claim 13. (Original) The system of claim 8 further comprising means for transmitting updates from the plurality of telematics service providers to the virtual garage.

Claim 14. (Currently Amended) The system of claim 8, wherein the medical log

~~personalized information~~ is transmitted from the virtual garage to the telematics device using an FM subcarrier network.

Claim 15. (Previously Added) The method of claim 1 further comprising:
requesting an emergency 911 service to a public service answering point using the telematics device; and
transmitting the medical log to the public service answering point.

Claim 16. (Previously added) The system of claim 8 further comprising:
means for requesting an emergency 911 service to a public service answering point using the telematics device; and
means for transmitting the medical log to the public service answering point.

Claim 17. (Currently Amended) A method of providing through an electronic medium a medical log of a customer on a telematics device included in a vehicle, the method comprising:
requesting, from the telematics device of the vehicle, the medical log of the customer from a virtual garage having communication links to a plurality of telematics service providers;
transmitting the medical log of the customer from the virtual garage to the telematics device of the vehicle, wherein the medical log is obtained from the virtual garage and the plurality of telematics service providers, and wherein the medical log includes non-audible data;
storing the medical log in the telematics device of the vehicle; and
retrieving the medical log of the customer from the telematics device of the vehicle

during a medical roadside emergency.

Claim 18. (Previously added) The method of claim 17 further comprising requesting an emergency 911 service to a public service answering point.

Claim 19. (Previously added) A method of claim 18, wherein the vehicle comprises an emergency assistance vehicle.
